

Teaching and Education Activities IML

IML academic staff has for long been involved not only in the development of courses for the medical program as well as the postgraduate medical education program but also in actively facilitating them. 2021 also saw the launch of the clinical and communication skills training in the recently launched master program in pharmacy. We have accompanied the first cohort of students and having directly delivered part of the course content. As an example it was very interesting to build a simulation pharmacy in the skills lab. Below is a shortlisted overview of IML's teaching activities.

Clinical Skills

- Phlebotomy course, Medicine 1st year
- Clinical skills course (esp. cardiovascular and pediatric), Medicine 3rd year
- Clinical skills course, Pharmacy 5th year
- Formative OSCEs, Medicine 3rd & 6th year

Communication skills

- Taking a history and providing feedback, Medicine 1st year
- Communication skills training, Medicine 4th & 6th year
- Lecture on interventions to promote health, Pharmacy 4th year
- Communication skills training for pharmacists, Pharmacy 5th year
- Interprofessional seminar on professional confidentiality (with Medicine, Nursing, Nutrition and dietetics, midwifery, physiotherapy)

MAS Medical Education program

- Quantitative Research Design and Methodologies in Education
